

2016 Subject Index

| | | | |
|--------------------------------------------------|-------------------------------------------------------|-------------------------------------------------------|---------------|
| 13C-glucose breath-test..... | 419 | DENND1A..... | 135 |
| 25-hydroxyvitamin D 1- α hydroxylase..... | 484 | Depression..... | 334, 439 |
| 46,XY disorders of sex development..... | 218 | Diabetes..... | 246, 257, 425 |
| 5-alpha reductase-2..... | 236 | Diabetes mellitus..... | 197 |
| 5-alpha-reductase..... | 218 | Dual oxidase 2..... | 224 |
| Acanthosis nigricans..... | 374 | Dual oxidase maturation factor 2..... | 224 |
| Active video game..... | 334 | Dysgerminoma..... | 351 |
| Adipokines..... | 321 | Dysmenorrhea..... | 192 |
| Adolescent..... | 55, 67, 74, 80, 92, 163, 192, 250, 289, 313, 411, 419 | Early obesity..... | 432 |
| Adolescent girls..... | 150 | Early puberty..... | 211 |
| Adrenal insufficiency..... | 468 | Early signs..... | 432 |
| Agouti-related protein..... | 40 | Eating behavior..... | 250 |
| Alpha-melanocyte-stimulating hormone..... | 40 | EIF2AK3..... | 497 |
| <i>ALPL</i> gene..... | 360 | Endocrine dysfunction..... | 330 |
| Ambiguous genitalia..... | 236 | Epiphyseal dysplasia..... | 497 |
| Androgen receptor gene..... | 232 | <i>Escherichia coli</i> | 325 |
| Anorexia nervosa..... | 92 | Exercise..... | 334 |
| Anthropometric measurements..... | 32 | Exposure..... | 298 |
| Anti-Müllerian hormone..... | 55, 289 | Failure to thrive..... | 356 |
| Arm span-height difference..... | 144 | Familial hypocalciuric hypercalcemia..... | 341 |
| Aromatase..... | 205 | Fetal..... | 114 |
| Atherosclerosis..... | 74, 150 | Final height..... | 211 |
| ATP-sensitive potassium (KATP) channel..... | 197 | Fluoxetine..... | 347 |
| Attention deficit/hyperactivity disorder..... | 61 | Follicle-stimulating hormone..... | 163 |
| Autoimmune thyroiditis..... | 105 | Food choices..... | 250 |
| Body mass index..... | 392 | Forced swimming test..... | 439 |
| Breast-milk iodine concentration..... | 381 | Fracture..... | 445 |
| Calcitriol..... | 484 | Fracture healing..... | 445 |
| Calcium..... | 341, 461 | Free thyroxine..... | 26 |
| Calcium-sensing receptor..... | 341 | Free triiodothyronine..... | 26 |
| Carotid intima-media thickness..... | 150 | Gastropliation..... | 250 |
| Cathelicidin..... | 325 | Gender re-assignment..... | 236 |
| Central hypothyroidism..... | 86 | Genotype..... | 228, 482 |
| Child..... | 67, 157, 445 | Gestational impaired glucose tolerance..... | 264 |
| Child obesity..... | 334 | Ghrelin..... | 250, 425 |
| Childhood obesity..... | 40 | Glucose..... | 270 |
| Children..... | 61, 74, 80, 282, 325, 330, 452 | Glycerol kinase..... | 468 |
| Chinese Han women..... | 405 | Goiter..... | 241 |
| Chronic autoimmune thyroiditis..... | 276 | Gonadoblastoma..... | 351 |
| CLPP..... | 472 | Gonadotropin-releasing hormone agonist treatment..... | 365 |
| Congenital hypothyroidism..... | 21, 170, 224, 375, 439, 478 | Gonadotropin-releasing hormone analog..... | 211 |
| Contaminants..... | 257 | Growth..... | 306 |
| Cord blood..... | 270 | Growth hormone..... | 96, 490 |
| Corticosterone methyl oxidase..... | 356 | Growth hormone deficiency..... | 96, 490 |
| Cortisol..... | 270 | Growth hormone treatment..... | 306 |
| Craniosynostosis..... | 374 | Gynecomastia..... | 232 |
| Crouzonodermoskeletal syndrome..... | 374 | Hashimoto thyroiditis..... | 92, 150 |
| <i>CYP11B2</i> gene..... | 356 | Height..... | 144 |
| <i>CYP19A1</i> gene..... | 205 | Hereditary medullary thyroid carcinoma..... | 14 |
| Cytokine signaling..... | 452 | HHEX..... | 21 |
| Cytokines..... | 399 | Hyperglycemia..... | 425 |
| Delayed adrenarche..... | 86 | Hyperinsulinemic hypoglycemia..... | 375 |
| Deletions..... | 468 | Hyperinsulinism..... | 197, 347, 375 |
| | | Hyperinsulinism/hyperammonemia syndrome..... | 228 |

2016 Subject Index

| | | | |
|-------------------------------------------------------------------|------------------------|----------------------------------------------|------------------------------|
| Hyperparathyroidism | 341 | Newborn | 187, 298, 321, 478 |
| Hyperthyrotropinemia | 157 | NF1 gene | 96 |
| Hypocalcemia | 101 | Non-alcoholic fatty liver disease | 1, 32 |
| Hypoglycaemia | 347 | Noonan syndrome | 96, 306 |
| Hypoglycemia in infancy | 375 | Novel mutation | 86, 107, 360 |
| Hypogonadism | 163 | Nutrition | 67 |
| Hypogonadotropic hypogonadism | 125 | Obesity | 1, 32, 74, 80, 157, 282, 452 |
| Hypomagnesemia | 101 | Oral glucose tolerance test | 419 |
| Hypoplasia of corpus callosum | 374 | Osteopontin | 399 |
| Hypothyroidism | 92 | Osteoporosis | 163 |
| Idiopathic short stature | 144 | Ovarian development | 205 |
| Immunoglobulin super family member 1 deficiency syndrome | 86 | Overweight | 157 |
| Incidence | 170 | Ovotestes | 351 |
| Infant | 445, 381 | Pancreatectomy | 197 |
| Infantile hypophosphatasia | 360 | Pancreatic beta-cell | 257 |
| Infantile seizures | 101 | Pancreatic hypoplasia | 246 |
| Inferior vermis | 374 | Parathyroid hormone levels | 461 |
| Inherited | 330 | Partial androgen insensitivity | 232 |
| Inhibin-A | 289 | Patient education | 411 |
| Inhibin-B | 289 | Pediatric | 26 |
| Inorganic phosphate | 461 | Pediatric endocrinology | 411 |
| Insulin | 270 | Pediatrician attitudes | 368 |
| Insulin resistance | 257, 270, 282, 419 | Periaortic fat thickness | 74 |
| Insulin-like peptide-3 | 289 | Perrault syndrome | 472 |
| Iodine deficiency | 61, 170 | Persistent hypoglycemia | 478 |
| Kabuki syndrome | 105 | Phenotype | 228, 482 |
| Lactating women | 381 | Phthalate | 298 |
| Large for gestational age | 264 | PNPLA6 | 125 |
| Leptin | 250, 321 | Polycystic ovary syndrome | 1, 55, 135, 289, 405 |
| LHCGR gene | 107 | Polymorphism | 218, 452 |
| Luteinizing hormone | 392 | Precocious puberty | 392 |
| Macro-orchidism | 86 | Prediabetes | 80 |
| Magnesium tolerance test | 180 | Prediction | 321 |
| Mass spectrometry | 26 | Preterm | 298 |
| Maternal obesity | 114 | Prevention | 368 |
| Menstrual characteristics | 192 | Proinsulin | 425 |
| Meta analysis | 135, 264 | Pseudoautosomal region 1 | 144 |
| Metabolic control | 48 | Pseudohypoparathyroidism | 432 |
| Metabolic diseases | 330 | Pseudotumor cerebri | 365 |
| Metabolic syndrome | 1 | Puberty | 125 |
| Metabolic values | 32 | Pyridoxine responsive | 360 |
| Microalbuminuria | 399 | Quality of life | 67 |
| Mitchell-Riley syndrome | 246 | Rats | 439 |
| MLL2 gene | 105 | Reductase deficiency | 236 |
| Multiple endocrine neoplasia | 14 | Reference interval | 26 |
| Mutation | 21, 125, 218, 224, 241 | RET mutation | 14 |
| Neonatal | 114 | Retinopathy | 399 |
| Neonatal diabetes | 497 | Robotic surgery | 250 |
| Neonatal intensive care units | 298 | rs10818854 | 135 |
| Neonatal screening | 170 | rs2479106 | 135 |
| Neonates | 425 | Salt iodine concentration | 381 |
| Netrin-1 | 282 | Salt wasting | 356 |
| Neurofibromatosis type 1 | 96 | Screening program | 187 |
| Neurofibromatosis-Noonan syndrome | 96 | Secondary amenorrhea | 472 |
| | | Selective serotonin reuptake inhibitor | 347 |

2016 Subject Index

| | | | |
|--------------------------------------------|----------|------------------------------------------------|------------------------|
| Self-esteem | 334 | Transient hypothyroidism | 170 |
| Sex hormone-binding globulin..... | 1 | Transient receptor potential melastatin 6..... | 101 |
| Sex-determining region on the Y chromosome | 351 | Treatment..... | 55 |
| Short- and long-term effects..... | 114 | Treg cells..... | 276 |
| SHOX gene | 144 | Tubal hyperplasia..... | 351 |
| Side effect..... | 365 | Tubular dysfunction | 282 |
| Single nucleotide polymorphism | 405 | Turkey..... | 187 |
| Sirolimus | 478 | Turner syndrome..... | 490 |
| Soluble endoglin..... | 313 | Type 1 diabetes mellitus..... | 48, 67, 180, 313, 399 |
| Sporadic medullary thyroid carcinoma | 14 | Type 2 diabetes..... | 1 |
